EDUCATION

UCLA Anderson 2004
Executive MBA

UCLA 1994
B.S. Mathematics & Applied
Science

SKILLS

Domain Expertise

- ★ LLM & AI Systems
- ★ Full-Stack Architecture
- ★ Systems Engineering
- ★ Technical Leadership

Technical Skills

- ★ Python
- ★ TypeScript/JavaScript
- ★ React
- ★ Node.js
- ★ C
- ★ PostgreSQL
- ★ MongoDB
- ★ Firebase
- ★ Cloud Infrastructure (GCP)

Strategic & Management

- ★ Product Roadmapping
- ★ Technical Strategy
- ★ System Architecture & Design
- ★ Multi-Disciplinary Program Leadership
- ★ Executive Communication

Ron Many

SUMMARY

30+ years building systems that work — from enterprise software through robotics to LLM-powered AI. I've adapted through every industry shift, and I'm building the most technically interesting systems of my career right now.

Technical Manager & AI Change Leader @ Elbit · Director of Product & System Engineering @ Fabric · VP R&D @ C-Vision · UCLA Anderson MBA

EXPERIENCE

Elbit Systems – Technical Manager

Feb 2025 – Present | Netanya, Israel

- Technical authority for large-scale, multi-disciplinary programs spanning software, hardware, mechanics, and systems integration. Manage the full engineering lifecycle — from requirements and architecture through development, testing, and delivery.
- Coordinate cross-functional teams, subcontractors, and external partners to deliver mission-critical systems. Translate operational needs into system-level solutions as the primary technical interface between program management and customers.
- Drive technical innovation, AI adoption, risk management, and continuous improvement across engineering teams. AI Change Leader — championing the integration of AI and LLM-based tools into engineering workflows and product capabilities.

Fabric – Director of Products & Director of System Engineering

Sep 2019 – May 2024 | Tel Aviv, Israel

A startup creating robotic base Micro Fulfillment Centers to enable on-demand order picking for grocers and retailers.

Director of Products (2022 – 2024)

- Built the roadmap for a major strategic transition from service offering to platform product
- Defined product add-ons, upsell opportunities, and tools for service and commissioning teams
- Led organization-wide transformation to align product mindset and execution with company goals

Director of System Engineering (2019 – 2022)

- Managed a team defining and prioritizing the robotic automation solution across hardware, infrastructure, and software
- Created a new KPI framework that drove a 60% increase in robotic efficiency
- Designed and built the SOC main SW tool (Python/React) — increased remote ticket resolution speed by 80% and issues resolved remotely by 50%, significantly reducing operational costs
- Developed commissioning tools and methodologies for deploying dozens of micro-fulfillment centers per year in Israel and the US

Languages

- ★ English (Native)
- ★ Hebrew (Native)

C-Vision Group – Vice President R&D

Nov 2009 – Aug 2019 | Caesarea, Israel

An integrator and provider of custom automation solutions specialized in industrial control, mass transit and tunnels controls.

- Managed and mentored a team of 12 developers and integrators, delivering custom software and automation solutions across Israel's largest industrial clients – Tnuva, Israel Electric Company, Coca-Cola, ICL, and more
- Led complex integration and development projects including Jerusalem Light Rail (traffic priority SCADA), Gilon Train Tunnel (tunnel controls), and Tara Dairy (full production process automation)
- Directed sales and marketing strategy, securing major accounts and multi-year projects

Strix Systems – Software Team Lead

May 2006 – Jul 2008 | Los Angeles, CA, USA

- Led development of management software for MESH Wi-Fi system using JavaScript and Google Maps API
- Enhanced system capabilities and UI, enabling large-scale deployments covering city-wide areas

Earlier Career

1991 – 2006 | California, USA

- Chief Engineer, CIO, and Business Owner roles.
- Scaling a startup from 3 to 200 employees,
- CIO during two mergers,
- founded and ran a \$20M company with 24 employees,
- enterprise software consulting for Lexar and other major brands.
